Introduction

Behavioral research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment.

A person's behavior is a necessary and integral part of who they are. In other words, much of our behavior comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behavior.

In this report we have adapted the individual information to reflect the behavioral styles of the team. The most effective teams have members who understand themselves as well as each other.

This report analyzes behavioral style; that is, a person's manner of doing things. Is the report 100% true? Yes, no and maybe. We are only measuring behavior. We only report statements from areas of behavior in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

Primary Behavioral Style Overview

The following charts show the group's overall primary adapted behavioral styles by percentage. The primary behavioral style is determined for each individual by looking at the point that is furthest from the energy line, whether it is above or below. The primary behavioral style, whether above or below, is the individual's strongest behavioral style.

The Success Insights® Wheel

The Success Insights® Wheel provides a visual format for plotting the data obtained from the Style Insights® questionnaire. The Wheel demonstrates the similarities and differences in behavior amongst team members. The Wheel quickly gives a visual representation that allows you to explore behavioral styles based on eight specific identifiers:

- Conductor
- Persuader
- Promoter
- Relater
- Supporter
- Coordinator
- Analyzer
- Implementor

The following pages will detail the strengths, weaknesses, problem solving abilities, communication preferences and potential areas to avoid within each of the eight identifiers. As a team it is important to recognize, understand and appreciate the different behavioral styles represented. This will allow for increased productivity and overall team cohesiveness.

Potential Need for Team Members

This section is designed to provide information on behavioral styles that may be low or absent from the team dynamic. The following pages will explain what each of these behavioral styles brings to a team. In some cases not all behavioral styles are needed for a team, and in other cases some team members may be adapting to fill in the gaps as needed.

Team Style Blending

This section focuses on the common behavioral roadblocks among the different styles and indicates how well styles will initially blend and how much they must adapt in order to communicate effectively. It is important to note that this DISC report only interprets behavior and does not account for the influence of values. Even if styles blend well together problems may still arise based on conflicting values.
